

Prioritizing uninterrupted operations

Turbo UptimeCare

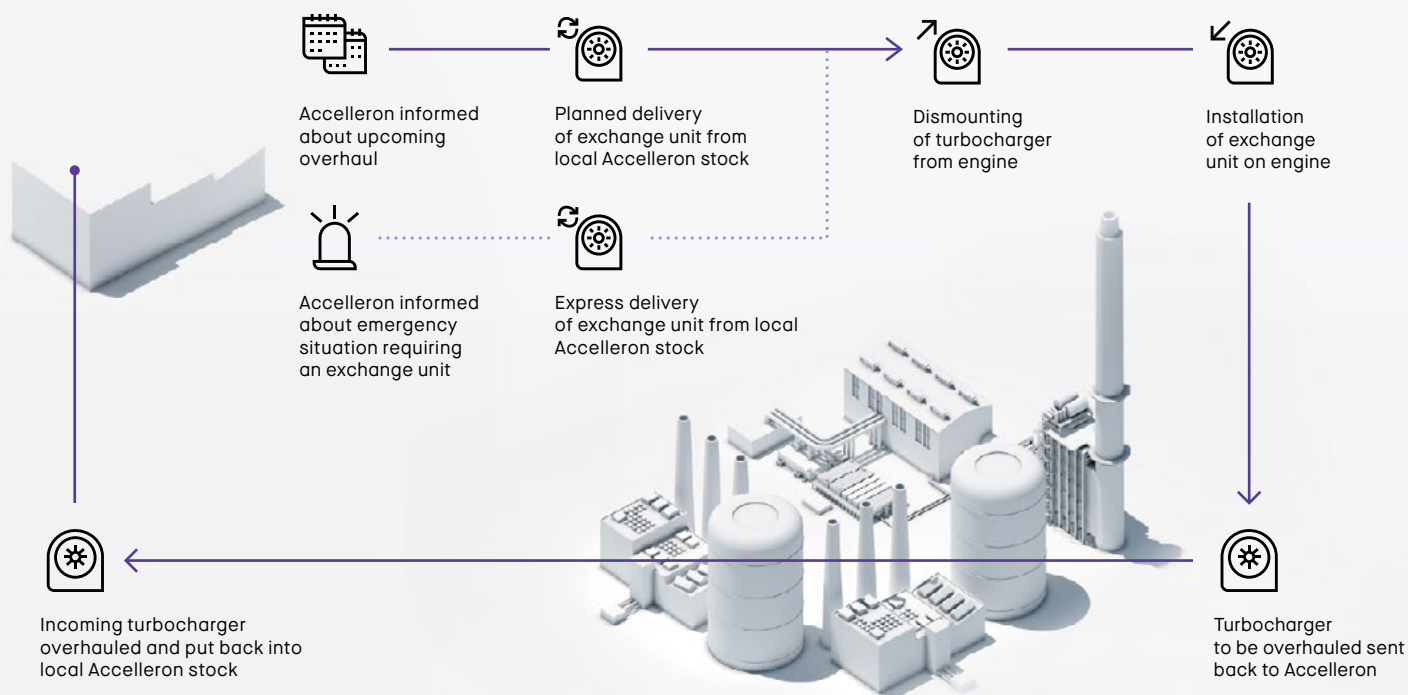

Turbo UptimeCare is a modular turbocharger service agreement for customer requiring the highest operational availability from their turbocharged high-speed engines used for power generation

High-speed power generation

Never let a turbocharger overhaul interrupt your power generation

At turbocharger service time, or in an emergency, Accelleron's Turbo UptimeCare service agreement prioritizes uninterrupted operations. We'll swap out the old turbocharger to get

your engine up and running again. So there's no waiting around for parts – just complete confidence and continuous uptime

Turbo UptimeCare.
How it works

Benefits

Uptime

- All exchange units delivered ahead of service activity

Performance improvements

- Possible upgrade of turbochargers at the time of overhaul

Predictable and steady service investments

- Defined coverage based on the service option chosen

Convenience

- All overhauled turbochargers fully Accelleron service compliant
- Delivered exchange unit good-to-go for next service interval
